Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 27-31 are, drawn to a method for driving a liquid crystal cell with a low voltage signal comprising a value obtained via a single variable linear function for temperature compensation, classified in class 345, subclass 101.
 - II. Claims 9, 12-14 and 17-19 are, drawn to a liquid crystal cell structure comprising a plurality of micromirrors on a substrate and a partial polarization rotation retarder, classified in class 349, subclass 117.
 - III. Claims 20 and 22—25 are, drawn to a liquid crystal system comprising a polarization beam splitter and a drive circuitry having a processor and at least two frame buffers to provide frame updates to the liquid crystal cell, classified in class 345, subclass 99.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions In the instant case, the different inventions I-III they do not have to be used together since they have different modes of operations drawn to different aspects of the invention.

Application/Control Number: 10/675,648

Art Unit: 2629

3. Because these inventions are independent or distinct for the reasons given

above and there would be a serious burden on the examiner if restriction is not required

because the inventions have acquired a separate status in the art in view of their

different classification, restriction for examination purposes as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Mike Fatahiyar whose telephone number is (571)272-

7688. The examiner can normally be reached on Monday-Friday from 9:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Richard Hjerpe, can be reached on 571-272-7691. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
